Digital Media

Digital display and Hand Sanitizer

The pandemic led to new hygiene practices, as soon as customers entered shops and buildings.

This new product enables better communication, with a professional appearance, from the first point of contact with customers.

The screen allows messages and visuals to be programmed remotely, which can easily be modified at will.

A touchless soap dispenser is at the base of the brushed aluminum casing.

Features

Wall mounting or floor standing installation are both easy and professional set up;

- ✓ 1 electric cord, wifi connexion;
- ✓ May be connected to an existing digital signage network or be run independently;
- ✓ 2 front doors opening separately:
 - upper part for screen and PC-player,
 - bottom part for soap or disinfectant liquid;

Possibility to add a barcode reader or others digital related options;

Designed by VIF Télé and manufactured in Canada, except the electronic components.
